To whom it may concern:

I have used Atwell Salvage and Demolition exclusively for all my demolition and salvage projects for over twenty years. At all times they have been safe, efficient and professional in all aspects of the work required.

One such project required the dismantling and salvage of components from a \$6M dollar house that was stripped to the bare bones before being demolished. Removals consisted of numerous imported and hand-crafted items and fixtures that were required for reuse.

Atwell's approach is one I am totally comfortable with and that is why I have never felt the need to look elsewhere. I would recommend them without reservation.

Please call me if I can be of any further assistance at 602-432-5350
