

To Whom it May Concern,

Hearts of Stone is a 501-c3 charitable organization which was founded by myself and my employees at our company, Master Marble Ltd in 1998. As the director, I have had the extreme pleasure of working with Mick and his team at Atwell Salvage and Demolition for more than 15 years. Once houses are donated to our charity, it is Atwell's responsibility to carefully remove all items and materials that are sold for re-use and/or recycling. These projects have been for the most part, very large, high end properties in Scottsdale, Paradise Valley and Arcadia. One recent deconstruction was a very difficult hillside location where strict attention to all aspects of the surrounding environment were required. Atwell completed the task ahead of schedule and made it look easy as they ensured satisfaction for all involved which included the City of Paradise Valley, the donor, general contractor and our charity. We have never been disappointed.

Mick's extensive knowledge of the removal process, marketing methods, value of the materials in question, and the support of his safe, professional and efficient crews, make for a very successful teamwork experience. I would do not hesitate to recommend them for any salvage or demolition project, and I would be happy to discuss this personally if you would like to contact me.

Listed below are a few of the projects we have completed within the last two years and the approximate size of the homes involved.

Sincerely

Steve Sanchez
